New Hours Next Term at Mitchell, Coolidge, Others

The Granite City school board Monday night for 1968-69 to keep increased transportation costs to a minimum. A more uniform starting time was set for Mitchell grade school, which has been opening at 8:30 a.m. The new schedule includes bus routes to Grigsby junior high school, which will open this fall.

Staggered hours permit some buses to serve more than one school building, reducing overall bus costs. Instead of the 27 morning and 32 afternoon runs this year, there will be 30 morning and 33 afternoon runs, with daily cost rising from \$1041 to \$1066, a difference over 177 days of \$406.

Junior High Schedules
Bi-State Transit System provides the service under a contract with the school system. Possibility of 34 and 37 runs totaling \$1154 a day was discussed and avoided through time adjustments, such as Central junior high school changing from 8 a.m. to 8:30 a.m. and Lake grade school from 8:45 to 9 a.m.

Granite City high school will retain an 8 a.m. start and nearby Coolidge junior high will switch from 8:30 to 8 a.m. Little added congestion is expected because, with the Grigsby opening, there will be only one bus going to Coolidge.

The starting and dismissal times in 1968-69 will be as follows:
GCHS and Coolidge, 8 a.m. to 3:20 p.m.
Central, 8:30 a.m. to 3:30 p.m. (Fewer lunch periods are needed than at other junior highs.)
Grigsby and Prather, 8:30 a.m. to 3:45 p.m.
Emerson grade school, 8:40 a.m. to 3 p.m.

Prohndt, Logan, Maryville, Mitchell, Nameoki, Parkview and Stallings grade schools, 8:45 a.m. to 3 p.m.
McKinley grade school, 8:50 a.m. to 3:05 p.m.
And Lake, Marshall, Niedringhaus, Washington, Webster and Wilson grade schools, 9 a.m. to 3:15 p.m.

Faculty Additions

Court Rules Against County on \$100 Fees

A temporary injunction preventing Madison county from collecting \$100 license fees from out-of-state garbage and trash haulers was served on Jack Clifford, county sanitation officer, in a court order served Monday.

The order resulted from a suit filed for Mal Landfill Corp. and several Missouri haulers contesting the power of the county to establish different fees for Illinois and Missouri dumpers, and called the regulations unconstitutional.

The injunction eliminated a tentative agreement in which the Mal Corp. would have posted \$50 per truck in escrow for Missouri haulers pending the outcome of legal action.

The order does not effect the \$10 license and inspection fees for Illinois trucks.

Wounded Accidentally

John Van Deusen, 20, of 4039 Stearns avenue, was admitted to St. Elizabeth Hospital at 5:45 p.m. Monday, suffering a bullet wound to the left foot. Van Deusen was wounded accidentally when his gun slipped during target practice.

3 Arrested in Venice Gang Disturbances

Venice police broke up two gatherings of youths on Weaver street in North Venice Monday night and arrested three persons, two of whom are to be given hearings on peace disturbance charges.

Officers said they received the first call at 10:45 p.m. Monday to disperse a gang of about 200 youths that had gathered on Weaver street. As police arrived, the crowd ran into West Madison.

Half an hour later officers were called to the 300 block of Weaver street where they found a gathering of about 15 boys. The gathering split into two groups and ran in different directions as officers approached.

Police later arrested Otto Johnson, 18, of 1139 Douglas street, and Claude Garrett, 21, of 411 Mercedia street, both of whom were named in peace disturbance warrants. A 14-year-old juvenile also was arrested and turned over to his parents with a reprimand.

Clean Air Board Selects SIU-SW Prof for GC Job

Granite City's Air Pollution Control board selected Prof. Edwin H. Parrill, PhD, of Edwardsville to fill in for Prof. Erwin Hoelscher as acting technical secretary and also adopted a 1968-69 budget for presentation to the city council.

The actions were taken during a meeting of the board Monday evening at the city hall.

Regular Meeting Here For State Air Board

The May 23 meeting of the State Air Pollution Control Board in Granite City will be the regular monthly meeting of the state group, it was reported today by Henry Bienecki, chairman of the city clean air board. It is not a hearing, he said.

The 10 a.m. meeting is to be held in the city hall and is open to the public. Mrs. Jean Francis, president of the Citizens for Clean Air, announced she is planning to attend to file a complaint concerning red dust.

Bienecki said the state board has taken action to approve abatement programs of two local firms and may take action on the programs filed by other local industries at the May 23 meeting. "Approval by the Illinois board means that none of these firms will be considered to be in violation of present Illinois regulations for the next five years," the local chairman said.

Storm Fails to Halt Jaycees' Cook-out

Last night's storm impeded the Granite City Jaycees outdoor steak fry which preceded the monthly meeting in the Jaycee Clubhouse on Poplar street.

The inclement weather, however, failed to stop about 40 members and their guests from broiling their own steaks and fixing individual salads, but the meal was eaten indoors.

Principal speaker was Edward Hagen, sports coordinator of the Jaycee Brewing Co. and the St. Louis Cardinal football team, who showed filmed highlights of the Big Red's 1967 season and discussed prospects for this year.

John Robertson, chairman of the Jaycee Junior Sports Jamboard, announced that registration forms are now available from school physical education instructors or Jaycee members for youngsters planning to compete in the annual event.

The local contest will take place at 10 a.m. Saturday, May 25, at the Granite City high school athletic field.

Approve Stock Plan
The stockholders approved an amendment to the company's certificate of incorporation authorizing an increase in the number of authorized shares of Granite City Steel common stock from 7.5 million shares to 10 million shares and authorizing 1.5 million shares of new preferred stock of no par value and issuable in series.

The amendment also eliminates 97,735 shares of preferred stock, none of which was issued or is outstanding.

The board of directors recommended a flexible capital structure suitable for mergers, acquisitions and a possible future arrangement for conversion of stock. There are no plans at this time to issue any of the newly authorized shares.

All members of the board of directors were re-elected during the session. They are: Maurice R. Chambers, chairman of the board and president of Interco, Inc., St. Louis; Kenton R. Cravens, chairman of the executive committee of Mercantile Trust Co., St. Louis; Bertram B. Culver, Jr., president, the Gabler Educational Foundation, St. Louis; Aiken W. Criticizes Steel Imports
A movie illustrating the growing amount of steel imports into this country and their effect upon the economy of steel producers in the U. S. was shown after the business session.

Veeder told the stockholders that he was going to Washington immediately to attend meetings involving the steel import problem.

He said foreign steel imports during the first quarter of this year amounted to 3.4 million tons, indicating a total 1968 import of about 15 million tons, or one-third more than last year, from foreign ports last year.

He attributed the loss of \$500 million in the steel industry last year to low-level steel profits resulting from imports.

A bus tour of the plant for inspection of the new BOP and hot strip facilities followed the meeting.

Rail Safety Program Urged by Candidate
A five-point safety program for railroads will be proposed by Terry L. Francis, Granite City attorney and candidate for state representative of the 58th district in the approaching primary election, if he is elected. Francis declared in a statement today.

The Democratic candidate said that public safety demands that (1) blinker signals be kept repaired so that they flash only when trains are approaching the crossing; (2) that all railroads have a reflective band horizontally across them so that approaching vehicles can tell a train is on the track; (3) that all multi-track crossings be protected by gates; (4) that no train or series of trains be permitted to block a crossing for more than ten minutes; (5) that track maintenance be assured by programmed schedules required by law.

Francis noted that motorists have become unwary at crossings because blinkers so often operate when no train is approaching. At night, he said, it is difficult to see trains on a crossing.

The most unsafe practice of all, he said, is the blockage of crossings for long periods of time. "Even if it did not result in accidents," he asserted, "the long delays are expensive. Hundreds of man hours are lost daily in our community by blocked crossings."

Board Fights

enforcement of the county statute and bring about a court case.

"It's Pretty Lousy"
"I think it's pretty lousy," said James Heil, assistant state's attorney, advised that the injunction is permanent, less appealed, and that the county could not base an appeal other than on the two points at issue.

He also said that limiting the number of licenses would not prevent Missouri haulers from dumping here, as they are licensed there as trash collectors.

Walter Sparks, Chouteau township supervisor, suggested that the county board control its own landfill to the exclusion of others, as is being done in Los Angeles and other urban areas.

The county could charge dumping fees, and reclaimed areas could be converted to recreation areas and other purposes.

Clifford advised that the Horsey & Shifrin survey report on refuse disposal, which includes all phases, should be in the hands of the board in June. Harry Briggs, legislation chairman, reported that a bill is in the recessed session of the State Legislature in July to prohibit out-of-state banning. "I hope it passes."

John Churovich of Granite City complained that the board is not receiving sufficient help from state agencies' departments, and that an additional assistant state's attorney should be hired and assigned to the county board, or the board should have one of its own.

Appointment Committee
Prior to the long debate, the board approved standing committees appointed for the year by Harold Landolt, chairman. Rodger Eble of Wood River, a Landolt foe who was unlisted on any committee, amazed his associates when he declined to vote "no" on the appointments, Landolt, with a chuckle, said "he must be satisfied."

There were few changes in the committee lineups and none in the chairmanships.

Two-year re-appointments were approved for Raymond E. Jones as maintenance engineer at \$3800 per year and Ernest Stumel as assistant at \$2760.

Bids calls were authorized for the purchase of a photo copy machine for the circuit clerk's office, to tuckpoint sidewalks and terra cotta approaches to the courthouse and to repair the museum basement.

Braves Win Loop Baseball Championship

Coolidge junior high school wrapped up the Madison County Junior High School Baseball Conference championship Wednesday by blasting Prather 10-1 on a four-hitter by Joe Wallace.

The Braves, winning their fifth game in a row, finished the league season with a 5-0 record. They lost two and tied one at the start of the season.

A 12-hit Coolidge attack was sparked by a bases-loaded double in the second inning by Ken Simon, scoring three runs. Wallace fanned five batters and walked three. Hurling for the Prather Chiefs were Steve Morse, Phil Parks and John Ireland.

The game completed the season for Prather, which finished with a 2-6-1 record. Coolidge is in its final game this afternoon against West Junior high at Alton.

Ned Tapp and Kim Gauen combined forces Tuesday afternoon to pitch a no-hitter against Edwardsville as the visitors lost to Coolidge 2-0.

Cars in Friday Races At Local Track Noted For Fast Acceleration

The Tri-City Speedway, 5100 Nankook road, will be the scene of racing by more than 30 semi-modified cars Friday. Time trials on the half-mile dirt track will start at 7:30 p.m. and racing at 8:30 p.m.

State Has Pamphlet On New Firearms Law

William T. Lodge, director of the Illinois Department of Conservation, said today that all inquiries concerning the Firearm Owners' Identification Act should be directed to the administering agency which is the Department of Public Safety. Firearm Owners' Identification Division at 1035 North Park Drive, Springfield, Ill. 62704.

Lodge said the Conservation Department has received numerous requests for information concerning the firearms act. These have been forwarded to the Department of Public Safety for reply. However, unnecessary delay can be avoided if the inquirer will write directly to the Firearms Division.

Lodge further said that it is not necessary to have the firearms permit before purchasing an Illinois hunting license.

County Has Adjusted to Court Orders; Scroggins
Madison county is learning to "live with" controversial U.S. Supreme Court rulings. Madison Rotarians were told at their weekly luncheon yesterday by State's Attorney Leon Scroggins.

Despite the famous Miranda ruling and other court decisions, Madison county has met with 100% success in obtaining admission of confessions offered as evidence, Scroggins said. He praised the efforts of police, who he noted have participated in a series of seminars on new investigative procedures.

Scroggins reviewed the duties of his office, which include prosecuting criminal, support and juvenile cases and serving as legal advisor to the county board of supervisors and all county officials. He said that his staff of seven assistants has a schedule that calls for at least one to be present at all times in the office.

He was introduced by William Kinder, a member of the club and an assistant state's attorney. President Harvey Miller presided and guests included Oscar Albert of St. Petersburg, Fla., who retains his Madison Rotary membership by attending Rotary meetings in Florida.

Man on Bike, Boy, 15, Among 8 Hurt In 16 Accidents

A man on a bicycle and a youthful driver were among eight persons injured in 16 accidents which occurred in the Quad-Cities area this week.

William Dixon, 26, of 2028 (rear) Washington avenue, was injured when the bicycle he was riding was struck by an auto driven by Robert J. Konstanzer, East Alton, at 3:25 p.m. Monday at 2021 Washington avenue. Dixon was admitted to St. Elizabeth Hospital with a paralyzed leg and other injuries. He told police that he did not see the auto approach and crossed the street, causing the collision.

Paul Dale, 15, son of Mr. and Mrs. William E. Sherman, 609 Barkley street, Mitchell, was admitted last night at St. Elizabeth Hospital with abrasions to the left shoulder and small head cuts. He sustained the injuries when the family auto he was operating struck a tree on old Post road, a short distance from his home.

The Madison county sheriff's office reported the youth apparently ran off the road as he turned a corner and sideswiped a tree. The youth was booked for having no driver's license.

Richard Holland, 26, of 1835 State street, suffered minor injuries at 9:30 p.m. yesterday when the car in which he was riding struck some rocks and ran onto the railroad tracks at Edison avenue and 18th street.

Police reported the car was driven by Dennis F. Tipton, Grandby, Mo. Four other passengers were unhurt.

Leonard Barton was released after x-rays of the face and arm were taken, and Dennis Barton was released after treatment of pains to the left elbow and abrasions of the face and both arms. St. Clair county deputies reported the car was driven by Terry Brown, Madison, who was unhurt. Several other passengers in the car also were unhurt.

Shirley J. Green, 31, of 2911 Sunset drive, complained of pains after the rear of her auto was struck by a skidding pickup truck driven by Ligie Witt Waddell, 100 Briarhaven drive, at 3:45 p.m. Monday at Niedringhaus and Madison avenues.

MORE ABOUT 1st Hiring

wards street to Marshall school and transfer of 20th and 21st streets between Omaha street and Edwardsville road to McKinley school.

A new training class to be formed is to be located at McKinley school.

Parkview plans include renting of two rooms at nearby Peace Lutheran Church for kindergarten classes.

A delegation of Parkview parents headed by Robert Hildebrand and Robert Kirgan objected to separating classes from the school building and cited traffic hazards in pupils crossing Edwardsville and St. Clair.

Dr. E. W. Walton, board president, stressed that the plan is tentative at this stage.

Rehire Supt. Davis
The board hired Supt. Bob J. Davis for the 1968-69 year at an increased salary to be decided by June 30. Architect Grigal Drulgeroff was asked to inspect property to be specified by the district. Both actions followed an executive session.

Comments by board members describing the superintendent's work as outstanding were placed in the minutes. Davis has held the position for the year and a half since the death of Supt. Russell D. Johnson.

Board Secretary Carl Macios was named to represent the board on a panel of citizens which will advise the district on sex education programs.

The board took steps to accept \$4392 as its portion of \$13,468 in protested property taxes now being distributed.

Sabbatical leaves in 1968-69 were approved for four faculty members. Frederick L. Moody is to attend a mathematics institute at the University of Montana. Mrs. Angelle Mathis science study at the University of Illinois. Alfred Leavelle continued study at Indiana University for a doctorate of education degree and Mrs. Estelle Massie "Netstep" fellowship study at SIU-SW if selected.

350 Employees Strike At General Steel Today
About 350 members of the Boilermakers Welders Local Union at the General Steel Industries plant walked off the job this morning over a disciplinary action taken by the company against an employee Wednesday.

The union committee also left the plant, and no discussions were under way at noon today, according to Thomas R. Remington, president of the castings division. The walkout was termed as unauthorized, the company said.

The rest of the plant is still operating, but Remington said it could not continue to do so more than a few days under the circumstances.

Union officers declined to comment.

State Seeking Bids On Three Buildings

Three proposed building projects have been announced for the Illinois Building Authority by John A. Kennedy, director of the Department of General Services.

The projects include two regional state office buildings to be built in Collinsville and Marion and central dietary at the Alton State Hospital.

Specifications and plans for the projects may be obtained from the Office of Supervising Architect, Department of General Services, 703 State Office Building, Springfield.

Proposals will be opened in the Chicago office of the Illinois Building Authority on June 11 for the regional offices and on June 13 for the dietary facility.

TB Sanatorium to Close Dec. 31, To Operate Clinic

The Madison County Tuberculosis Sanatorium will discontinue its operations with the expiration of its state license on Dec. 31, the county board of supervisors was informed at its regular meeting Wednesday morning.

The institution's board of trustees cited a declining case load and increasing state regulations. An out-patient clinic will be operated with continued use of present clinic facilities in the south part of the first floor.

The trustees also are planning to construct a new clinic building on part of the present grounds on Route 159 south of Edwardsville in the future when it will completely vacate its current quarters.

15 Patients in April

The sanatorium, which had a case balance of 395,145 as of April 30, ended that month with 15 patients, less than 20% of its capacity, and the trustees said indications show that this level will continue to decline.

The letter, signed by trustee George J. Weider, of the hospital at the end of the year could be transferred to a state regional hospital.

Meanwhile, the county board of supervisors has been considering conversion of the sanatorium building into a nursing home as it has nearly twice the capacity of the current county nursing home in Edwardsville, now filled with 59 patients. The current nursing home, also faced with stringent state regulations, could be used as a nursing care center.

May 20-26 Events are Planned for Salvation Army Week

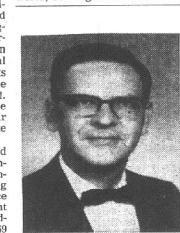

A series of events, commemorating "Salvation Army Week," May 20-26, is planned this week and next by local Salvation Army leaders, according to Capt. and Mrs. Harold F. Thomas, officers-in-charge, who invite the public to visit the Granite City headquarters.

In connection with the observance and the Salvation Army Girl Scouts' 50th anniversary, the local Corps held a mother-daughter banquet Tuesday evening, attended by 46 persons.

Principal speaker was Mrs. Major Effie Heaver, League of Mercy director for Missouri and southern Illinois, whose subject, "Walking Through Your Hat," was illustrated with fashionable headwear.

The Salvation Army was founded in London, England, in 1865 by William Booth, an itinerant Methodist minister, whose belief, "A man may be saved, but he is never out," still guides the organization today.

The Corps was introduced into the United States 15 years later, and now operates a network of religious and social service establishments in more than 70 countries throughout the world, serving human needs regardless of race, color or creed.

Local Republicans Hear Altorfer Talk at Belleville

A large delegation of Quad-City Republicans was in Belleville yesterday evening for a dinner and reception honoring John Henry Altorfer of Peoria, candidate for governor in the June 11 primary.

Earlier, Altorfer was guest of honor at an afternoon reception given by Madison County Republicans at the Sunset Hill Holiday Inn.

Speaking at Belleville, Altorfer proposed that the Division of Highways be separated from the Department of Public Works and that responsibility for highway planning, construction and financing be placed under a new Illinois Highway Authority.

The proposed authority, he said, should be headed by an executive director appointed by the governor and administered by a 10-member board representing the state's 10 highway districts.

The candidate noted that of more than \$500,000,000 collected for the state road fund this biennium from motor fuel taxes, that "only 31.6% will actually be made available for highway construction, rehabilitation and improvements."

Nearly \$120,000,000 will be diverted to cover administrative costs of other agencies and \$204,000,000 will be used to cover administrative costs of the division of highways.

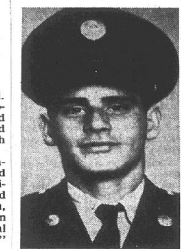

Under his proposal, the highway authority would set up three programs—Interstate and other projects receiving federal aid; maintenance and rehabilitation of primary and secondary state highways and new construction on a pay-as-you-go basis, and new construction to be financed with the sale of bonds to be retired from existing road funds.

Illinois Central to Cut Six Trains Monday

The railroad claimed that all the runs it wanted to cut operated at a \$400,000 loss in 1966. The Springfield trains stopped at Madison.

It proposed to replace the Carbondale trains with bus service for Southern Illinois University students and travelers wishing to make mainline connections to Miami and the Southeast.

Miss Kuenstler Chosen GCHS Teacher of Year

Miss Helen Kuenstler, head of the English department at Granite City high school, has been selected as teacher of the year by graduating seniors.

SIU Senior Scholars To Be Given Gift Books

A new way of recognizing outstanding senior scholars will be inaugurated at Southern Illinois University this evening.

This year the 174 graduating seniors who have maintained a 4.25 grade point average (out of a possible 5.0) during their four years at the University will be presented books from the SIU Press.

"Books for Brains" was decided upon by the convocation committee as a more appropriate form of recognition than the plaques which have been awarded in past years, according to Drew H. Marace, spokesman for the committee.

The President's Scholars and faculty members were asked for their opinions, Marace said, and they agreed that "books were something a person could remember and have around — especially with a bookplate that indicates a student has been honored for his scholastic achievement."

Each of the seniors will receive specially designed bookplates entitling him to \$15 worth of books of his choice published by the SIU Press.

Record Crowd Views Schools 'Acres of Art'

Despite the inclement weather Monday evening, a record crowd of 2500 people attended the "Acres of Art" show in Memorial gym of the senior high school. The hours were from 6 to 9 p.m. but in anticipation of the display of art from all the schools in this district, the first arrivals were at 4 p.m. and the exhibit was kept open until 10 p.m.

Eugene Alassi, art education consultant for the school district, commented this was one of the largest crowds to attend this annual show and they viewed art from the elementary and high school level, which has improved in quality over any other year. Those involved in the art programs of the schools are especially grateful for the interest shown this year.

Statistics provided by the county official disclose that 269 sets of twins were born in Madison county between 1960 and April this year. The largest number in any one year during that span of time was in 1961, when 47 sets arrived.

In other years, the records show that 40 sets of twins were born in 1960; 47 sets, 1961; 42 sets, 1962; 29 sets, 1963; 29 sets, 1964; 23 sets, 1965; 26 sets, 1966; 21 sets, 1967; and 13 sets through April. Triplets were born in 1963 and again in 1964.

GC Democrats Endorse Dr. Lee for Delegate

Dr. John E. Lee, mayor of Venice, was endorsed Monday night by the Granite City Democratic central committee in his candidacy for election as delegate to the National Democratic nominating convention.

Twenty-four of the city's 32 committeemen met in the Ross Bowl to vote the endorsement which was the only matter on the agenda, according to William Warfield, chairman of the city committee.

Mayor Lee, a leader of the Venice-Madison Democratic organization, is opposing Dick H. Mudge of Edwardsville in a three-way race for two delegate posts in the 24th congressional districts. He is running with Monroe L. Finn, East St. Louis, in an effort to win both Democratic delegate spots.

Mudge, in his opposition to Lee, also is backing a candidate for love board membership in opposition to incumbent William "Mike" Eberhardt of Venice and Joseph Grant of Granite City who are associated with Mayor Lee.

The \$15,000 Misunderstanding

Dodge polara

If you think big, roomy luxury cars cost more, you're right. But in the case of Dodge Polara, the difference in price is just five or six dollars over the most popular Ford and Chevrolet, comparably equipped. See the chart at the right. You get Polara's big-car roominess, big 318-cubic-inch V8, and torsion-bar suspension priced just a few dollars more than Ford and Chevrolet when you deal with the Dodge Boys.

An auto accident which occurred last Friday afternoon was incorrectly reported Monday. The auto of Bernice Skinner, 400 West avenue, which had stalled, was being pushed and struck the auto of Mary Niesciur, 3415 Lydia lane, which was parked at Ponton road and Franklin avenue.

Area Draft Call Friday for 17

Tomorrow's draft call for the Quad-Cities has been revised and lowered to 17 youths and the June quotas have been received. It was announced Wednesday at the county selective service office at Edwardsville.

The 17 draftees and 37 youths scheduled for pre-induction physical examinations are to report at 6:30 a.m. tomorrow to the county selective service office in the Federal Building at Edwardsville, 132 North Kansas street.

Quotas for June include 13 youths for the draft and 35 for physical examinations on June 21. On the same date, 10 youths from the Edwardsville area are to be drafted and 50 are to report for physicals. Quotas for the Alton area next month are nine for induction and 32 for physical examinations on June 7.

Absentee Balloting Open For June 11 Elections

Madison county voters who will be out of the county on primary election day June 11 may now file application for absentee ballots, according to announcement by County Clerk Eulalia Hotz.

Applications will be mailed directly from the county clerk's office upon request. The application will be checked to determine if the applicant is properly registered, Miss Hotz said, and if so a ballot will be sent to the voter.

In the primary election, she pointed out, the voter must designate if a Democratic or Republican ballot is preferred. In addition, a small white non-partisan ballot containing candidates for the County Board of School Trustees, will be sent. On election day the absentee ballots are delivered to the proper polling places and counted along with the vote cast during the primary balloting.

City Would Get \$1780 Taxes From Reilly Tar

The Granite City corporate fund, on the basis of 1967 tax rates, would gain about \$1780 annually in tax income and Granite City township would receive \$164 in new taxes by the annexation of Reilly Tar & Chemical Co. to the city, statistics showed today.

The firm, now located in Nantuxi township, has petitioned the city to annex for fire protection purposes. A fire protection contract with the city expires June 8. The city several months ago cut off all fire protection outside the city limits.

Reilly Tar & Chemical had a total assessment of \$280,700 in real estate and personal property for the 1967 year. The 1967 tax rate of 68.3 cents per \$100 assessed valuation for the city of Granite City would net \$1780 against this valuation. The township rate of 6.3 cents applied against the assessment would produce \$164. The firm already is located in the school district, park district, county and levee district. On the basis of 1967 tax rates, applied against the company's \$280,700 valuation, the firm would pay taxes of \$7061 for the school district, \$445 for the park district, \$390 for the county and \$107 for the levee district.

Jurisdictional Limits, Duplication Handicap Local-Level Government

(University of Illinois Student Reporting Project)

The typical Illinois citizen has the idea that the job of his local government is to fix the streets, put up the park swings, synchronize traffic lights, zone the empty lots on the corner, add to the number of downtown parking spaces, control packs of stray dogs, haul away storm debris and "do something about that firetrap next door."

But if he wants to get in touch with his government about any of these things, he is probably not sure exactly who is responsible for what.

And after a couple of phone calls he begins to feel caught in a frustrating web of government "districts."

Big Ballots, Tax Bills

Then he remembers the last time he was at the polls, how he felt bewildered by the size of a ballot, and how, after opening his mail one day last spring, he felt crushed by taxes.

The average Illinois citizen is considerably less satisfied than his grandfather with the quality and quantity of local public services—and with the price.

Why?

Simply, it's that local government hasn't kept pace with changes in living. It has gradually become a not-so-efficient and expensive crazy quilt of overlapping and frequently function at cross purposes, sometimes leaving urgent needs unmet.

But local government, caught between modern demands and 19th century ways, is mostly helpless.

Features of State

Local government becomes splintered partly because state legislature does not allow it power over local affairs. It lacks power over local jobs like the licensing of hotels.

It lacks power to expand services to a growing population. The state tax rate and bonding limits can prevent a town's extending sewer lines, for example.

The American republican system requires strong, democratic local government. But local power has been forced to become so fragmented and ineffective that when it can get federal help, it often welcomes it.

Some experts say local government is getting too weak to survive.

Urbanization Trend

This century has seen sweeping changes in the American economy, business institutions, social conditions, population mobility, including movement from farm to city—"urbanization"—with one-half the population now suburban.

Local government, well designed to meet the simpler needs of yesterday, is poorly suited to cope with today.

There is popular discontent with taxes, particularly in view of the services they buy—as in highways, urban transportation, urban renewal, pollution protection and public employee salaries, at all levels.

The cost of local government more than doubled between 1952 and 1962 and is likely to double again by 1972. Local taxpayers bear the brunt of these increases.

Expenditure of Huge Sums of Taxes For

Columbia Bottoms Levees Not Justified

Efforts by Illinoisians to sidetrack development of Columbia Bottoms for airport and industrial construction are in the best interest of Missourians as well.

Americans everywhere are burdened with enough taxes without being saddled with millions of dollars of new debt to levee levees around the low, marshy area near where the Missouri River joins the Mississippi River.

In an era when metropolitan area leaders and planners emphasize the interdependence of all sections of a major population center, it is clear that the entire region would benefit from development of the 9,000 to 10,000 acres of ideal, flood-protected sites in the Quad-Cities and environs. New manufacturing plants on this Illinois territory, coupled with a new airport at Lakeside or elsewhere, would give a tremendous impetus to economic growth.

Columbia Bottoms falls to measure up to Madison-St. Clair counties industrial sites in land prices, fuel costs or availability of railroads, highways and water transportation. No secondary airport to Lambert Field.

The 4300-acre Columbia Bottoms tract is so unattractive and inconvenient that it would be getting no serious consideration at all—except for the fact that it is owned by the city of St. Louis, which packs considerable political elbow.

The latter fact is hardly a sufficient reason to justify wasting \$9 million of taxpayers' money to build huge new levees, which would serve only as monuments to the worst features of our governmental processes.

Poll Indicates That Some Assumptions

About Business Viewpoints Are Outmoded

"Strange things are happening" to supposedly typical business viewpoints. A poll of Tri-Cities Chamber of Commerce members on pending federal legislation shows that despite the lure of federal tax aid, 103 of 108 interviewed feel that such spending should be limited in order to check inflation and the weakening of purchasing power.

Even more surprising was a 56-45 vote opposing removal of the ban on secondary boycotts. Nearly half want to empower labor union leaders to sue their state or federal construction site or other operations when there is a grievance with one contractor.

Other surprises include a 60-27 tally favoring creation of a federal consumer protection service and a 45-27 vote to set up stringent federal laws governing business franchises.

For many years, voters, candidates and politicians have based their stances on political and philosophical assumptions dating back to 1932-era issues, but these seem increasingly irrelevant to the attitudes, campaigns and Congressional debates of 1968.

Challenge to Schools—Individualize Instruction at Reasonable Cost

By ROBERT W. LOCKE

Senior Vice-President, McGraw-Hill Book Company

(First of Two Articles)

The popular view of educational technology, unfortunately, is very superficial. Most people think of it in terms of the use of machines and software, of teaching machines and programs.

They've heard the Wall Street people pontificate about the marriage of electronics and publishing, and the industrialists talk about systems analysis to bring order out of educational chaos.

The schools of tomorrow have been described in terms of distance education, information retrieval, response mechanisms, closed-circuit television and, of course, computers.

In a country with unbounded faith in technology, there's an impatience to use electronics to speed the process of education.

But too much of the talk about gadgets, and too little about how children learn. Too often, educational technology is defined in terms of hardware and software and not in terms of teaching and learning.

We get carried away with the products that can be sold to schools, and don't worry enough about the process of instruction itself.

And yet the process is what's important, and its here that technology can make a difference. It can greatly improve our chances of making teaching more relevant to the stages and needs of today's schools.

Different children learn in different ways. They have different mental and mechanical skills, and

Will Pre-Election Resignation In This State Be Duplicated In Washington?

The resignation of Governor Otto Kerner effective this Sunday, May 19, elevating Samuel Shapiro to chief executive of Illinois in ceremonies next Tuesday, is noteworthy.

However, only surprise at the action was diminished by predictions (on this page March 4 and elsewhere in the state) that such a strategy had been devised when the Democratic central committee chose its slate of candidates.

It is the fourth resignation by an Illinois governor during the 150-year history of the state. John Reynolds, a Democrat, resigned in 1834 to enter Congress; Richard J. Oglesby, a Republican, in 1873 to become a U. S. senator; and Shelby Moore Cullom, a Republican, in 1883, also to enter the U. S. senate.

It will be recalled that there was a close link between Washington and Chicago in the slating deliberations which named Shapiro as the candidate for governor and William Clark to run for the senate against Sen. Everett Dirksen. As part of the agreement, Sargent Shriver, a Kennedy brother-in-law, stayed out of the race and later was named ambassador to France (also forecast here May 19).

Because of the participation by President Johnson, who appointed Shriver to the Paris post and named Gov. Kerner to the U. S. Circuit Court of Appeals bench, there is some speculation that Kerner himself may follow before November so that his favorite, Vice-President Hubert Humphrey, can run as an incumbent president.

No excuse was used in Illinois, but in Washington it is believed that a resignation would be based on doctors' orders. Physicians for some time have been advising the president, who suffered a severe heart attack in the mid-1950s, to reduce his work schedule.

It will be interesting to observe the reaction by voters in Illinois, and possibly throughout the U. S. Many professional politicians say it is a great advantage for an aspirant to already be fulfilling the duties of an office by the time votes are cast; others believe that voters prefer a free choice and may resent such "smoke-filled room" maneuvering.

Rain Here Always Increases Auto Damage, Injuries But Drivers Fail to Allow For It

One of the rules guiding newsmen in reporting the happenings and trends in their community is to avoid cynicism. They need to hope for the best while sometimes preparing for the worst, and to view events as they really are rather than from biased attitudes.

The Press-Record endeavors to keep its outlook fresh and optimistic, but a certain amount of doubt and gloom is unavoidable in relating local news, especially when streets and highways are slippery.

The sad fact is that Quad-Cities have become predictable, and depressingly so, in their driving habits and skills. When leaving a car to check with police, deputies or troopers on motoring conditions and developments, a newsmen knows to always take along extra pencils and paper when it has to shovel on visibility and road surfaces, drivers maintain "business as usual," attaining maximum authorized speed and following closely behind other cars. Accident rates soar, such as the past week-end's collisions, 35 injuries and one fatality were recorded.

Unfortunately, the next time there is a hard rain in the Quad-Cities, those extra pencils and paper will be filled again. Local residents have become too automatic in their motoring responses, failing to allow for increased hazards.

We, of course, will be happy if our pessimism proves wrong. During the next downpour, "no news will be good news."

Challenge to Schools—Individualize Instruction at Reasonable Cost

for this is that it is easier and it saves money. It's like producing automobiles: it was simple and easy when Ford had only one model, and Henry Ford got away with painting all the cars the same color.

Now, however, the automobile companies have figured out how to produce many different models with an almost unlimited number of colors and options, and still run efficient production lines.

Education, the other hand, still has too many of the characteristics of old-style mass production. It hasn't used the process of modern technology to cost-effective instruction at a cost that the taxpayers can afford.

That's precisely what educational technology hopes to accomplish.

The research groups in education itself, in the non-profit research organizations, and in the government, are using the findings of behavioral psychology and the techniques of systems analysis to create programs tailored to the needs of individuals rather than groups.

The outcome, we hope, will be instruction that is learner-oriented rather than teacher-oriented.

It will also be performance-oriented, and its goals will be stated in terms of what the individual student should be able to do.

One student may learn to play the piano by using a tape in a textbook, another may learn best through the visual medium of film, and a third may need both in combination.

The significance of all of this is that they give teachers more different ways of reaching their students, and they create more options.

An Author Who Disliked Writing

"My Brother Evelyn, and Other Portraits" by Alec Waugh, New York, Farrar, Straus and Giroux, 346 pages, \$6.95.

(Reviewed by Nicholas Jost, editor of the publication, "Papers on Language and Literature" at SIU-SW. Review published in the Daily Egyptian, SIU Department of Journalism, Carbondale.)

The twelfth of the twenty-one reminiscences in Alec Waugh's new memoir, "My Brother Evelyn," is undoubtedly the major piece in the volume.

Evelyn Waugh is a writer of major interest and his older brother, Alec, as a professional writer knows how to express those insights into Evelyn Waugh's personality that only a member of the family would have.

"My Brother Evelyn" is perhaps the most valuable, most fascinating, for its story of Evelyn Waugh's early vicissitudes—his disappointing career at Oxford, his long-lived feud with a vegetable Oxford don, his shattered first marriage, his dislike of the craft of writing ("Evelyn was,

in fact—at any rate until 1945—almost the only writer I know who did not like writing, in those early days, he resisted his fate.")

Without doubt, future critics and biographers of Evelyn Waugh will profitably mine the rich ore of "My Brother Evelyn."

The other twenty pieces in the book range from a portrait of the well-known cousin, Edmund Gosse, through accounts of Hugh Walpole, W. Somerset Maugham, and Michael Arlen (Christened, in his native Bulgaria, Dikran Koukoudjian—an Armenian expatriated all his life) to the story of how writing of "Island in the Sun," when its author was at his nadir, brought security and success to him in his late fifties.

In its entirety, the book gives a special pleasure to readers involved in writing and publishing. It is an informal, knowledgeable commentary on the English world of letters and writers since the turn of the century.

It also constitutes a fine self-portrait of a modest and courageous craftsman.

Steel Quotas Fair, Essential for U. S. Producers, Jobs to Survive

(Second of Two Reports by Granite City Steel Company)

Japan and, to a lesser extent, the nations of western Europe, have given first priority to their steel industries when they rebuilt their war-torn countries after World War II.

During the 1950s, their steel plants installed the latest and best equipment, much of it made in the U. S. and financed with U. S. loans and grants.

Thus, a particularly industry was able to improve efficiency and productivity in those nations much faster than in the U. S. and, as a result, the factor which over the long term determines their general level of wages.

The result of this concentrated attention have been especially marked in the case of Japan, which now accounts for 25% of all steel imports into the U. S.

The Japanese steel industry reached a high level of efficiency while wages in Japan, reflecting the total Japanese economy, are lagging behind. The result is a tremendous cost advantage for the Japanese steel producer.

It was in this same period that the world market for steel underwent a fundamental change. Many less developed nations which used to buy steel from the U. S. from each other decided their national interests required the development of their own steel industries. With their markets closed off to imports, the traditional producers were forced to look for other markets to invade each other's back yards.

Some nations of stemming the flow of imports is essential until it is possible to have genuinely free and fair competition between U. S. and foreign producers. We do not have it now.

Linked to World Leadership

Leadership in steelmaking has traditionally gone hand in hand with economic leadership in the world affairs. Today, the American steel industry is at the crossroads. We still lead the world—but not by much.

The U. S. is the one open market into which other nations can ship their surplus steel. American steel companies are losing important customers and providing fewer jobs.

The steel industries of Europe and Japan will continue to dispose of their excess steel in the U. S. unless our government demonstrates the same concern for the economic welfare of its own steel industry.

Affects Living Standard

The danger is that the American steel industry will suffer permanent damage before any action is taken to correct the situation. It is done about the import problem.

Should that happen, it may well be that we have exported not only steel but a lower standard of living for us all.

We urge you and your friends to make up your own minds on this situation. Then write the United States Senators and Congressmen who represent the state and district where you live.

The steel industry is asking that Congress take corrective action by passing H.R. 10,000, the Iron and Steel Orderly Trade Act of 1967, which was introduced by Senator Vance Hartke of Indiana and 35 other senators in the Senate on Oct. 16, 1967.

PROCLAMATION

Whereas, when leukemia strikes it represents a fearful, mortal blow. And, although, many government agencies and private foundations are seeking causes and cures for this disease, none has yet been found. There is no present cure and all we can do is alleviate distress; prolong the life of the sufferer.

Whereas, The Leukemia Guild, Inc., a volunteer, non-profit bi-state association exists to help leukemia victims and their families, without regard to race or color or creed on a neighbor-to-neighbor basis by making medicines and biologics available as the patient's physician prescribes and to provide transportation to hospitals where it is required.

By the powers vested in us as Mayors of the Quad-Cities, we proclaim the days from May 17 through May 20 as Let's Kick Leukemia Weekend and call on all of our citizens to support The Leukemia Guild in its efforts. We urge the co-operation of everyone in this worthy effort to extend a helping hand to a stricken neighbor. When your neighbor asks for your help, we hope it will be forthcoming.

Mayor of Granite City

Seeks Stamp to Honor 100th Baseball Year

Legislation calling for issuance of a six-cent commemorative stamp in observance of the 100th birthday of professional baseball has been introduced in Congress by Congressman Melvin Price (D-East St. Louis).

The stamp authorized in Congress would signify the centennial anniversary of professional baseball in America to be celebrated next year. Price, a former sportswriter said that baseball, as the national pastime, "certainly deserves this recognition."

'Music Under the Stars' Programs are Scheduled

The Granite City park district is announcing the dates for the "Music Under the Stars" concerts which will be presented again this summer in Wilson Park. The programs are under the direction of Warren G. Simpkins, vocal music instructor for Granite City high school, and are open to the public without charge.

This summer, for the first time, the concerts will be held in the new ice rink-recreation center. A stage will be erected at one end of the rink, and the audience may sit under the roof or under the stars.

Rehearsals and registrations begin Tuesday, June 4, during the regularly scheduled session as listed below, in the high school vocal music room, No. 135, Music Annex.

The "Music Under the Stars" rehearsal schedule is as follows: grades 7, 8, and 9 to meet Tuesday at 11 a.m.; grades 5, and 6 on Thursday at 11 a.m.; adults on Tuesday at 7:30 to 9 p.m. and high school students on Thursday from 7:30 to 9 p.m.

The first concert will be presented by the Granite City high school vocal music department as an expression of appreciation for the ice rink and its varied uses. The concert will be Thursday evening, June 13. Other concerts are to be presented on June 27, July 11 and July 25.

One Divorce Granted

Custody of two children was given to the mother, and the father was ordered to pay child support of \$100 per month.

Mecca Hears Details Of Employment Drive

A general discussion of the National Business Alliance movement to find jobs for the hard-core unemployed in the Illinois metropolitan area was held during a regular meeting of the Metro-East Chamber of Commerce at Augustine's restaurant, Belleville, Monday night.

The discussion was headed by Col. Charles E. Hoskins III, commander of the Granite City Army Depot and chairman of the Resources Board program to find jobs among industrial and business firms. Hoskins detailed the program and explained the steps being taken throughout the area.

The 18 Chamber representatives attending the dinner session also discussed the potential of a major airport in the Illinois area. The discussion indicated that there is no concerted or organized effort to establish such an airport, and presently involves only the individual plans of various Chamber groups, each favoring their own location.
